

Assembly Instructions (Pivot Stand)

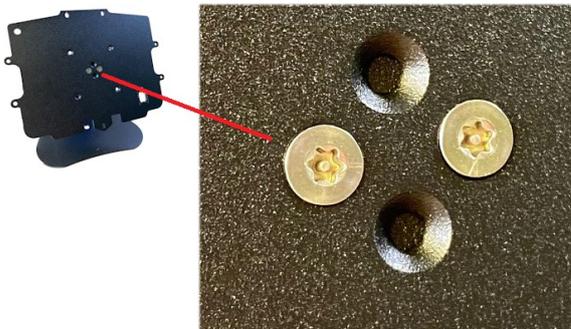

Included are 4 Slider Feet to protect Counter Surfaces (If not being bolted down)
2 Security Screws, one for Removing the iPad back and one for Adjusting the
Pivot tension to achieve the desired tension, 1 Cable Clip to hold the charging
cable in the desired position.

1. Remove the Screws from the back of the Frame and take off the back cover from the frame.

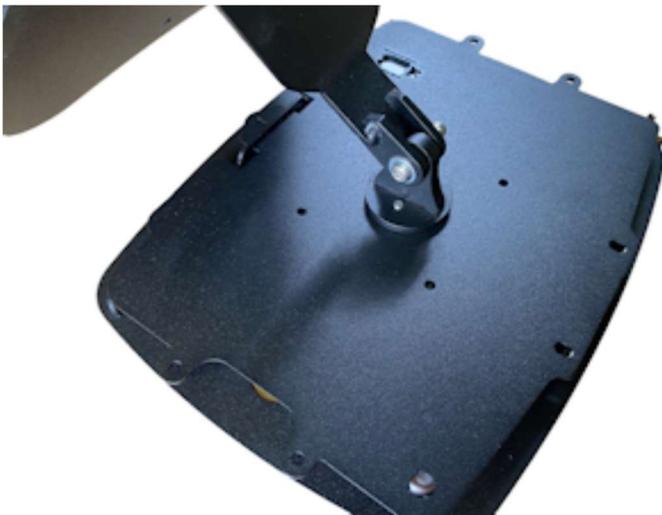

2. Remove the two screws from the base where the Frame will join the base.

3. Place the Frame's Back onto the base (choosing Landscape or Portrait mounting positions) and replace the two screws

4. Place the iPad into the frame positioning the camera at the top right.

5. Pick up the base with the back already mounted on it and insert the bottom of the Frame Back into the slot on the Frame. Make sure it is inserted enough to line up the top Screw holes.

If you have bolted the Base to a counter, the Frame and iPad can be picked up together, holding the iPad in the frame and slotting the frame from the bottom upwards on the base.

6. Replace the Security Screws on the back cover and you are ready to use your iPad.
