

# SpacePole MultiClip™

## A NextGen payment mount

### APPLICATIONS

- Secure counter top payments for Ingenico Lane series
- Ideal for retail, hospitality or any static payment transaction environment

### BENEFITS

- Compatible with Ingenico Group's entire Lane series
- PCI best practice compliance
- Reduced TCO with universal mounting
- Quick release mechanism for easy removal
- Simple click mechanism for one-step installation
- Anti-theft security with Kensington Push Lock
- For use with all SpacePole payment mounts:  
SpacePole DuraTilt®  
SpacePole Stack™  
SpacePole Low profile

### INTRODUCING A NEW STANDARD

The next generation SpacePole MultiClip™ universal payment mount from the Ergonomic Solutions Group has been developed in association with Ingenico to provide a simple click-in-place payment mount for existing and future Lane Series payment terminals. The mount is compatible with our SpacePole range of payment mounting solutions including our wider base SpacePole Stack™. Discreet and minimalist in design, MultiClip is the almost invisible way to mount the Lane Series ensuring that the payment terminal can effortlessly carry out NFC couponing and wallet use cases, in addition to EMV Chip & PIN, Swipe & Sign and contactless.

### PHYSICAL SECURITY

In association with Kensington, we have developed a push-lock especially for MultiClip, which not only secures, but contributes to the elegant and minimalist appearance of the total solution. The combination of SpacePole MultiClip and Kensington locks not only keeps your payment terminal safe, but also keeps your organisation in compliance with best practice recommendations.

The MultiClip also has a quick release clip enabling the terminal to be removed for PCI compliance inspection, for example, and it is equally as simple to re-engage with its mount.

MultiClip has the ability to become a universal standard for payment mounts, and is seen as such by both Ergonomic Solutions and Ingenico - as this industry leading collaboration shows.

SpacePole MultiClip takes payment mounting solutions to a new level of functionality and ease of use in line with the payments transactions environment in which commerce operates today, and tomorrow. It's time to meet the new standard.
